What is ITAnywhere?

P2 Technologies supports professional businesses by ensuring that their IT systems are up, running and optimised allowing the whole business to work smarter. IT Anywhere is a Cloud computing solution providing IT services on demand, regardless of location.

ITAnywhere provides:

- ✓ One monthly bill for new IT hardware, software and support.
- ✓ Renowned P2 managed IT support services.
- ✓ Reliable, secure, flexible IT system monitored and securely hosted by P2 allows off site working, anywhere and at anytime.
- ✓ Using a share of a vast network of computers lowers capital expenditure, allowing for a fast, measurable return on investment.
- ✓ Cloud computing removes the need to deal with the physical, hardware aspects of a computer and software maintenance tasks, freeing up time.

Case Study

Sheards Accountants wanted a cost effective, flexible IT support service which would increase staff productivity and improve its quality of service. By subscribing to P2 Technologies IT Anywhere service it has achieved this objective.

The Problem

Sheards initially approached P2 as it needed a more proactive service provider which would be able to meet the firm's requirements. It was looking for a cost effective IT business solution which would increase staff productivity and help to improve the quality of service that the firm delivers to clients, as well as allowing flexibility within the company.

Sheards Accountants wanted a cost effective, flexible IT support service which would increase staff productivity and improve its quality of service. By subscribing to P2 Technologies' IT Anywhere service it has achieved this objective.

Sheards Accountants

Sheards is a leading firm of Chartered Accountants, providing accountancy, tax and business advisory services to owner managed businesses and individuals, with a client base primarily across West Yorkshire. Sheards is well respected in the area, both for its long established reputation but also its fresh, modern and friendly approach with clients.

The Solution

The IT Anywhere service provides businesses with off-site IT facilities, monitored and securely hosted by P2 allowing staff to connect to their systems, anywhere, at any time of the day. Lowering capital expenditure and increasing flexibility, P2's 'IT Anywhere Service' allows businesses to obtain the latest IT infrastructure and managed IT support from one package.

Firms pay a monthly subscription fee for the service which provides staff with full access to its hardware and software via the Internet at any time of the day.

The Result

Kevin Winterburn, Director at Sheards explains:

"The IT Anywhere Service is proving to be a great benefit to the business, as it provides staff with a connection to our IT systems at any time of the day. This allows us to offer flexibility with both our clients and staff."

"Instead of having to wait until back in the office, our staff can print off reports and edit accounts whilst visiting clients. This has enabled us to improve the service we provide for our clients."

"I have been impressed by P2's professional approach to the business and am confident that they will look after us just as well as we look after our own clients. I also saw this as a great opportunity to support a local business just like ourselves."

Martin Page, Director of P2 said:

"We are delighted that Sheards have employed our IT Anywhere service. The service offers tangible business benefits, allowing our customers to focus on their work and for P2 to deliver IT solutions to improve their business process. I look forward to developing our relationship with Sheards and working with them to continue to develop their IT infrastructure."
